| Date          | 25 october 2022  |
| Team ID       | PNT2022TMID26473   |
| Project Name  | IoT Based Safety Gadget For Child Safety monitoring & Notification |
| Maximum Marks | 4 marks  |

#### Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered. Solution

#### Architecture:
